

CashControl CCE 100

Quick feature overview:

- Counterfeit detection with 100% reliability
- Easy software updates via PC
- Works both with power supply and batteries.

Recognize counterfeit money, effortless and without any training. 100% safe!

With our counterfeit detector CashControl CCE 100, you can rest assured that you've got 100% certainty. There aren't too many similar devices on the market, and hardly any of them can hold their own to the well-equipped CCE 100.

It offers top-notch quick and reliable counterfeit detection and is remarkably simple to use. Would you like to add another detectable currency or need an update? No problem for the CCE 100, due to its PC interface. Another big bonus is its portability. You can operate the device with regular power cord, but also on the go with its built-in battery.

Now that's what we call a great offer, isn't it?

Feature List
