We make cash flow.

ProDeposit mini

As straightforward as an automatic teller safe and daytime safe!

Large amounts of euro coins have been collecting in almost every household for years now, and they are hardly going anywhere. Elaborate counting of coins at bank and retail store counters is time and labour-intensive.

Now there is a clever solution for professional coin deposit via customer self-service: The compact SB coin counter ProDeposit mini has been specially designed for use in the counter room of banks, at transport companies, and for retailers.

Its simple operation enables customers to make deposits without guidance. Thanks to the thoughtful design, it is possible to make fully automatic deposits of mixed coins - without even pressing a button! After the deposit, the machine automatically prints a receipt, which for example can be immediately redeemed in the retail sector, and brings in additional sales. Optional fee models are possible.

- **Automatic start, stop, and receipt printing**
- **Clear, illuminated display**
- **Requires little space due to low system width**
- **The straight, simple design fits the ambience**
- **Maximum system availability and low susceptibility to failure**
- **High counting speed**

Highlight: Only 35 cm wide! Height 100 cm..

ProDeposit mini will convince you with its perfected technology

Extensive cleaning mechanisms help to maximise availability.
Due to its slim design the system can be used in the smallest space.

- Proven coin transport system
- Counting speed of up to 1,000 coins/min
- Cleaning tracks and integrated blockade check
- Thermal printer with graphic design options
- Security for foreign coin identification

Particularly service-friendly design

- Separate coin and technology unit
- Highest security against vandalism and burglary
- Cart solution instead of telescopic extension for easier transport
- Optional: Safe bags, coin bags, or coin containers

Safe: The technology unit is separate from the coin unit

Filling with euro coins

... Automatic counting ...

and fully automatic printout of the credit slip
